

Dear Mr. Haines,

5 April, 2007

I am pleased to inform you know that AIC has evaluated Precision Measurements, its facilities and procedures and find them compliant and certified to ISO 9001 specifications. We look forward to doing business with you long into the future.

On March 13th, 2007 Aerospace Integration Corporation conducted an ISO 9001 Audit at your facility. Though most areas were covered topically, the auditors were very impressed with your facility, operation, quality Manual, and Written Procedures. Areas inspected were in compliance with the AS9100B requirement. Specifically, the following areas were thoroughly evaluated:

- 6.2.2e Competence, Awareness, and Training.
- 7.4.1.45a List of approved Vondors
- 7.4.3.48 Certificates of Conformance and test
- 7.5.1.57 Accountability of product through it's manufacturing cycle.
- 7.6.88 Production and Inspection measuring devices controlled and with current calibration
- 8.3 Control and disposition of non-conforming product.

Again, Thank You for allowing us into your facility and to take a look at your operation. We look forward to continued success between our companies. If you have any questions, please don't hesitate to call. (850) 423-4130.

Kirk Carpenter
Chief Inspector
Lead Auditor
